

# Prescription Drugs

When you enroll in one of the medical plan options, you automatically receive prescription drug coverage through OptumRx.

The prescription drug plan is based on a three-tiered copay structure tied to a formulary drug list and a generic drug policy. The amount you pay for each prescription depends on whether the drug is a brand or generic medication and whether it appears on the formulary list of preferred medication.

The prescription drug coverage through OptumRx is the same for both medical plans.
